

# Sheridan Select™

Central Print Management  
Designed For Publishers

## Print Management, Made Easy.

Sheridan Select™ is both versatile and powerful yet keeps things simple and straightforward. From one-off print-on-demand (POD) jobs to print runs in the tens of thousands, Sheridan Select helps streamline your workflow and brings efficiencies to your business.

Whether you want fully automated data integration or a simple, easy-to-use web portal to upload files and place orders, Sheridan Select has you covered. The days of using FTP to send files, or digging through old emails trying to find a print order you submitted are over.

## Versatile Applications:

- Support for both books and journals
- Handles both conventional orders (first prints and reprints) and ultra-short run POD down to one copy
- One central platform supports multiple production plants
- Support for a “life of title” approach with long offset print runs down to single copy POD — all from the same platform
- Support for data-driven order and/or content integrations
- Support for multiple data integrations such as eCommerce storefronts, warehouses, production systems, ERP systems

## A Multitude of Benefits:

- The simple web interface is easy to use
- Structured ordering process allows for order placement, file uploads, special instructions — all in one place
- View all current and past order activity, including job status, from the central order history dashboard
- Users have their own unique access, with rights management to control what functions they can perform
- Order reprints with a few clicks
- Receive automated notifications based on system activity
- Sheridan Select Electronic Warehouse (SEW) for storage of content and content metadata
- Consistent order process, independent of production plant
- Sheridan Select is designed for publishers of all shapes and sizes

**Self-service convenience and control.**  
It's as simple as **Click, Upload, Order, Print.**
