Sheridan
CJK GROUP

Finally, an eCommerce POD Solution for Journals

Online Solutions Suite

With Sheridan Connect, your customers can now purchase single issues of journals direct from your website

The purchase convenience and flexibility of Sheridan Connect now extends to single journal copies. In addition to utilizing Sheridan Connect for online consumer sale of books, eBooks, and publisher anthologies, publishers can now also provide single issues of a journal title for sale as a physical copy from warehouse inventory or integrated print-on-demand.

Sheridan Connect is a publisher branded PCI compliant eCommerce platform that gives you the ability to sell content to your consumers. The platform is hosted in a secure server environment and is easily accessed via a dedicated URL link and/or from purchase buttons already existing on your current website. Sheridan manages the shopping cart experience as well as payment processing. We'll send you a monthly sales report and a check for your sales.

Connecting Consumers to Content

Sheridan Connect has already gained wide appeal with book publishers looking for a turnkey solution to sell content directly to consumers. This new single journal issue feature greatly extends the revenue opportunities of Sheridan Connect. But the opportunities don't stop there. Future program enhancements may include coupon codes and discounts, electronic products such as ePub for journals, mobile compatibility, and content rental options.

At Sheridan, we're making it easier for your audience to purchase what they want, when they want it! Talk to your Sheridan Sales Professional today.
