

Make Your Content Accessible to Everyone

Accessibility is no longer optional. It is a legal requirement, a business imperative, and an opportunity to create inclusive experiences for everyone. Publishers, healthcare organizations, government agencies, and educators face increasing pressure to ensure their digital content is accessible. KGL simplifies compliance by transforming complex accessibility requirements into high-quality, accessible content at scale.

WHY IT MATTERS

1 in 6

People globally live with a disability.

96%

Of leading websites still have detectable accessibility barriers.

WCAG 2.2

The current global benchmark for digital accessibility.

EAA 2025

The European Accessibility Act is now in effect across the EU.

WHAT WE MAKE ACCESSIBLE

Five content types, one compliance workflow, aligned to WCAG 2.2 AA, Section 508, ADA and the EAA.

DOCUMENTS & PDFS

Accessible PDFs and digital documents designed to meet Section 508 and WCAG 2.2 AA requirements. Services include semantic tagging, logical reading order, alt text, form remediation, Read Aloud validation, and comprehensive screen reader testing.

EPUBS

Born-accessible EPUBs developed in accordance with EPUB Accessibility 1.1 guidelines, including full MathML support where required. Validated for compatibility with leading assistive technologies including NVDA, JAWS, and VoiceOver.

GAMES

Accessibility audits and remediation services for games, including accessible navigation, remappable controls, voice-over support, screen reader compatibility, and WCAG-aligned user experiences.

WEBSITES

Website accessibility auditing and remediation aligned with WCAG 2.2 AA standards, with support for applicable AAA success criteria where appropriate. Services include keyboard accessibility, assistive technology testing, usability validation, and ongoing accessibility support.

COURSES

Accessible eLearning content developed to meet Section 508 and SCORM requirements. Services include captioning, transcripts, accessible interactions, screen reader compatibility, and functional accessibility testing.

WHY IT MATTERS

Accessible content expands your reach, improves user experience, strengthens brand reputation, and helps meet evolving regulatory requirements such as WCAG 2.2, Section 508, ADA, and the European Accessibility Act (EAA).

An increasing legal, operational, and customer experience priority for organizations worldwide. Whether you are publishing documents, websites, eLearning courses, games, or digital books, accessibility helps ensure everyone can access and engage with your content.

Accessibility made simple. Compliance made **possible**.

WHY KGL

Benetech Global Certified

As one of a select group of certified providers, KGL adheres to rigorous accessibility production standards that are independently audited and verified.

End-to-End Workflow

From content intake through remediation, production, quality assurance, and final delivery, our teams provide comprehensive accessibility support validated across NVDA, JAWS, VoiceOver, and TalkBack.

Any Content, Any Language

With specialist teams across the US, Europe, and India, we support everything from single-language documents to complex multilingual healthcare, education, and publishing programs.

SSP 2026 EPIC AWARD WINNER

AI-POWERED

AI-assisted alt text, reviewed by accessibility experts.

Our AI-assisted alt text solution combines intelligent automation with expert human review to generate accurate, meaningful image descriptions at scale, helping reduce remediation timelines and costs while maintaining quality.

Let's make your content work for everyone.

KGL helps you create inclusive content that meets global accessibility standards and delivers a better experience for every reader.
